PLUGVAN WORKSHOP MODULE

THE PLUGVAN WORKSHOP MODULE

CONVERTED IN 5 MINUTES

With the PlugVan modules, you can transform a panel van into a workshop vehicle in no time at all – and back again. The module is available in different versions, depending on your individual needs. With the workshop module, you remain flexible and can continue to use the vehicle for other purposes, e.g. as a van or as a camper. The workshop module can be combined with other PlugVan modules.

Simple conversion from empty van to workshop vehicle

Side extensions for optimum adaptation to the vehicle width

Light and power supply (optional)

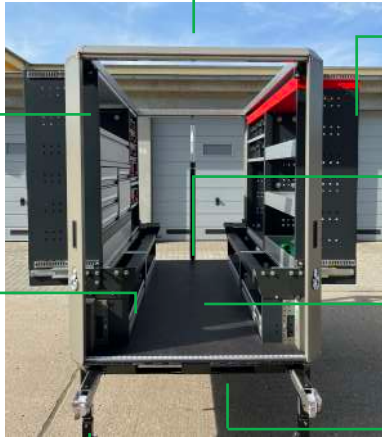

With table and/or motorbike holder

Large storage compartments for sorting boxes

Large central aisle as extra loading space

Integrated chassis for easy loading and unloading by yourself

Optionally with Forklift loading

ADVANTAGES

- Conversion of the vehicle in 5 minutes
- Easy handling due to integrated chassis or forklift loading
- Fits in almost every 3.5 t panel van
- Allows the multiple use of the vehicle
- With workshop equipment from Würth
- Also suitable for rental vehicles, as no modification to the base vehicle is necessary
- Shelf configuration can be planned individually
- Modular construction according to your own wishes and needs

FITS IN (ALMOST) EVERY PANEL VAN

The PlugVan modules are completely separated from the base vehicle and compatible with almost any van (3.5 t) – regardless of the manufacturer.

Citroën Jumper / Fiat Ducato / Ford Transit / Hyundai H350 / Iveco Daily / MAN TGE / Mercedes Sprinter / Nissan NV 400 / Opel Movano / Peugeot Boxer / Renault Master / VW Crafter
